PROFESSIONAL SUMMARY

Full Stack Web Developer with a previous career as a Project Management Consultant at Microsoft (2.5 years). I am known by clients and peers for my sharp attention to detail, big picture planning skills and motivation to deliver high quality work. Excellent communication and presentation skills developed from consulting diverse audiences, including C-Level Executives, and teaching English throughout Latin America.

TECHNICAL SKILLS

- HTML5, CSS3, Bootstrap
- GIT, GitHub, Terminal
- JavaScript, jQuery, Node.Js.
- AJAX, APIs, JSON
- React.js, React, React Hooks
- MySQL, Sequelize, Mongo DB

Relevant Experience & Projects

Pizza Cutter Website & Admin Dashboard | Full Stack Developer | Deployed Site | Github Link
Built a new modern site for Pizza Cutter restaurant with menu items stored in MySQL / Sequelize database. Including login portal for the owner to update menu item details and photos through an admin dashboard.
- **Role:** Led four person team as a project manager and coded both front and back end. Leverage ERD framework for database structuring with full CRUD functionality of menu items that dynamically update the customer facing site
- **Utilized**: Heroku, Sequelize, MySQL, Bcrypt, Express, Express-Session, Cloundinary, Dotenv, Node, Javascript, jQuery, JSON, Handlebars, HTML, CSS, Bootstrap, Materialize, GitHub, Git

Employee Directory React App with API | Full Stack Developer | Deployed Site | Github Link
This employee directory is a full stack web app built on React and features the Random User API. The UI is composed of components, responds to user search and clears the search bar and sorts data alphabetically.
- **Role:** Independently developed full stack application launched on Heroku with a React front-end framework to dynamically update elements to the page. Features RESTful conventions, model-view-controller file structuring and CRUD functionality
- **Utilized**: React, Heroku, MySQL, Node, Express, Handlebars and ORM. HTML, CSS, Bootstrap, Javascript, jQuery, JSON, GitHub, Git

In the Moment – Event & Brewery Finder | Front End Developer | Deployed Site | Github Link
A web app to search for events in a specific city based on TicketMaster API and discover unique breweries near the venue.
- **Role**: Developed a comprehensive application as the project manager,including JavaScript search engine developer, CSS lead developer. Used JSON / local storage to store API information and dynamically update page elements.
- **Utilized**: HTML, CSS, Foundation, Javascript, jQuery, Server-side APIs, AJAX, JSON, GitHub, Git
